Reporting Currency, Financial and Other Information

All amounts in this report are expressed in thousands of United States ("U.S.") dollars, unless otherwise indicated.

Financial information is presented in accordance with accounting principles generally accepted in the United States ("U.S. GAAP").

References to "Rare Element," the "Company," "we," "our," and "us" mean Rare Element Resources Ltd., our predecessors and consolidated subsidiaries, or any one or more of them, as the context requires.

Cautionary Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains "forward-looking information" within the meaning of Canadian securities legislation and "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 (collectively, "forward-looking statements"). Such forward-looking statements concern our completion of a feasibility study ("FS"), our development plans for the Bear Lodge Rare Earth Element Project ("Bear Lodge REE Project" or the "Project"), our projected timing for Project commissioning, our future capital and financing needs and our ability to meet these needs. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and the reasonable assumptions of management.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect," "is expected," "anticipates" or "does not anticipate," "plans," "estimates" or "intends" (including negative or grammatical variations thereof), or stating that certain actions, events or results "may," "could," "would," "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be forward-looking statements.

Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from our expectations and include, among others, the factors referenced in the "Risk Factors" section of our Annual Report on Form 10-K for the period ended December 31, 2013, including, without limitation, risks associated with:

- our history of losses and need for additional financing;
- our lack of history of production from our mineral properties;
- numerous uncertainties that could affect the profitability or feasibility of the Bear Lodge REE Project;
- the exploration, development and operations of our Bear Lodge REE Project;
- increased costs affecting our financial condition;
- volatile rare earth markets, including fluctuations in demand for, and prices of, rare earth products;
- establishing adequate distribution channels to place our product(s);
- competition in the mining and rare earths industries, including an increase in global supplies or predatory pricing and dumping by our competitors;
- technological advancements and the establishment of new uses and markets for rare earth products or the substitution of other materials in applications that currently utilize rare earth products;
- the specific product(s) from our Project potentially having a limited number of customers, which could limit our bargaining power and profitability;
- our proprietary, patent-pending, processing technology that could encounter unforeseen problems, unexpected costs or both in scaling it up to commercial application;
- mineral reserve and resource estimation;
- the permitting, licensing and regulatory approval processes for our operations;
- potential future changes in governmental and environmental regulations and with proposed legislation, including measures regarding the mining industry and climate change;
- the potential difficulty of attracting and retaining qualified personnel;
- potential shortages of equipment and supplies;
- mining and resource exploration and development being a potentially dangerous activity;
- operating in the resource industry, which can be highly speculative and subject to market forces outside of our control:
- title in our properties or mining claims;
- insurance for our operations that could become unavailable, unaffordable or commercially unreasonable or have exclusions from coverage for certain exposures of our business;

- our land reclamation requirements could become too burdensome or expensive;
- information technology system disruptions, damage or failures;
- foreign currency fluctuations;
- our dependence on key personnel;
- our directors, officers or key contractors may be engaged in other businesses;
- enforcement of civil liabilities in the United States;
- our securities, including in relation to both company performance and general security market conditions; and
- tax consequences to U.S. shareholders related to our potential status as a "passive foreign investment company."

This list is not exhaustive of the factors that may affect our forward-looking statements. Although we have attempted to identify important factors that could cause actual results to differ materially from those described in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, believed, estimated or expected. We caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Except as required by law, we disclaim any obligation to revise or update any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. We qualify all the forward-looking statements contained in this Quarterly Report by the foregoing cautionary statements. We advise you to carefully review the reports and documents we file from time-to-time with the United States Securities and Exchange Commission (the "SEC"), particularly our Annual Report or Transition Reports on Form 10-K. The reports and documents filed by us with the SEC are available at www.sec.gov.

1. NATURE OF OPERATIONS

Rare Element Resources Ltd. (collectively, "we," "Rare Element" or the "Company") was incorporated under the laws of the Province of British Columbia, Canada, on June 3, 1999.

We are focused on advancing the Bear Lodge Rare Earth Element ("REE") Project located near the town of Sundance in northeast Wyoming. The Bear Lodge REE Project consists of a large disseminated REE deposit and a proposed hydrometallurgical plant to be located near Upton, Wyoming. The REE deposit is one of the highest grade REE deposits identified in North America and one of the highest grade europium deposits in the world. In addition, the Bear Lodge REE Project has a favorable distribution of the remaining critical rare earth elements ("CREEs"), which the Company defines as neodymium, europium, dysprosium, praseodymium, terbium, and yttrium. At present, we are undertaking advanced engineering, process confirmation, geological modeling and technical studies while working toward obtaining the necessary permits and licenses to enable us to develop the Bear Lodge REE Project. Based on review of current permitting timetables and other factors, the Company currently projects project commissioning to begin in mid-2017, subject to permitting, financing, FS finalization and other factors, including, but not limited to, production of marketable products from the larger-scale demonstration project and contractual arrangements with potential off-take customers. In accordance with U.S. GAAP, we are an exploration stage entity. To date, we have no revenue and have an accumulated operating deficit of \$110,533 of which \$62,369 is attributable to the exploration and evaluation of our mineral interests.

Our continuing operations and the recoverability of the carrying values of our mineral property interests are dependent upon the development, mining and processing of economic mineral reserves at the Bear Lodge REE Project, our ability to obtain the necessary permits and licenses to mine and process these mineral reserves and on the future profitable production of these mineral reserves. Development and/or start-up of the Bear Lodge REE Project are also dependent upon our ability to obtain the necessary financing to construct and complete the Bear Lodge REE Project. Although we have been successful in raising capital in the past, there can be no assurance that we will be able to do so in the future.

2. BASIS OF PRESENTATION

In accordance with U.S. GAAP for interim financial statements, these consolidated financial statements do not include certain information and note disclosures that are normally included in annual financial statements prepared in conformity with U.S. GAAP. Accordingly, these unaudited consolidated financial statements should be read in conjunction with our audited consolidated financial statements as of December 31, 2013, which were included in our Annual Report on Form 10-K for the period ended December 31, 2013. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (which are of a normal, recurring nature) necessary to present fairly in all material respects our financial position as of September 30, 2014, and the results of our operations and cash flows for the three and nine months ended September 30, 2014 and 2013 in conformity with U.S. GAAP. Interim results of operations for the three and nine months ended September 30, 2014 may not be indicative of results that will be realized for the full year ending December 31, 2014.

Recent Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-15, "Presentation of Financial Statements-Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern" ("ASU 2014-15"). ASU 2014-15 is intended to define management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. The amendments in this ASU are effective for reporting periods beginning after December 15, 2016, with early adoption permitted. We are currently assessing the impact the adoption of ASU 2014-15 will have on our financial statements and related disclosures.

In June 2014, the FASB issued ASU No. 2014-10, which amended Accounting Standards Codification (ASC) Topic 915 Development Stage Entities. The amendment eliminates certain financial reporting requirements surrounding development stage entities, including an amendment to the variable interest entities guidance in ASC Topic 810, Consolidation. The amendment removes the definition of a development stage entity from the ASC, thereby removing the financial reporting distinction between development stage entities and other entities from U.S. GAAP. Consequently, the amendment eliminates the requirements for development stage entities to (1) present inception-to-date information in the statements of income, cash flows and shareholder equity, (2) label the financial statements as those of a development stage entity, (3) disclose a description of the development stage activities in which the entity is engaged, and (4) disclose the first year in which the entity is no longer a development stage entity. This amendment is effective for fiscal years beginning after December 15, 2014, and interim periods therein. Early application of each of the amendments is permitted for any annual reporting period or interim period for which the entity's financial statements have not yet been issued. We are currently assessing the impact the adoption of ASU 2014-10 will have on our financial statements and related disclosures.

3. FAIR VALUE OF FINANCIAL INSTRUMENTS

Our financial instruments can consist of cash and cash equivalents, marketable securities, accounts receivable, restricted cash, accounts payable and accrued liabilities. Included, at times, within cash and cash equivalents is an enhanced yield deposit account that contains an embedded derivative in the form of a foreign currency option. Due to the short-term nature of the option contract and the relatively low volatility between the U.S. dollar and Canadian dollar, the liability portion of the derivative instrument is de minimis. As of September 30, 2014, the Company had no such deposits. U.S. GAAP defines "fair value" as the price that would be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price) and establishes a fair-value hierarchy that prioritizes the inputs used to measure fair value using the following definitions (from highest to lowest priority):

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 Observable inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data by correlation or other means.
- Level 3 Prices or valuation techniques requiring inputs that are both significant to the fair-value measurement and unobservable.

The Company considers all highly liquid instruments purchased with an original maturity of three months or less to be cash equivalents. The Company continually monitors its positions with, and the credit quality of, the financial institutions with which it invests. Periodically throughout the year, the Company has maintained balances in various U.S. operating accounts in excess of U.S. federally insured limits.

The following table presents information about financial instruments recognized at fair value on a recurring basis as of September 30, 2014 and December 31, 2013, and indicates the fair value hierarchy:

	Sep	tembe	er 30, 201	4	Decen	nber 31	2013

5. SHAREHOLDERS' EQUITY

Common Shares

	Number of shares issued	Com	nmon shares (\$)
As of December 31, 2013	47,627,245	\$	100,513
Exercise of stock options - cash Exercise of stock options - fair value	79,971		139
Issued during the nine months ended September 30, 2014			
As of September 30, 2014	47,707,216	\$	100,652

On January 2, 2014, a cashless exercise was made resulting in the issuance of 79,971 shares. Due to the nature of the cashless exercise, no cash was received by the Company and share issuance costs of \$42 were incurred.

Warrants

Outstanding warrants include 1,338,688 warrants, each exercisable for one of the Company's common shares, issued to investors in connection with the September 27, 2013 registered direct offering. The exercise price and exercise period of each warrant are \$4.15 and three years, respectively.

In addition, the Company issued to an agent in connection with the September 27, 2013 offering 133,869 warrants, under the same terms as those issued to investors.

6. ADDITIONAL PAID-IN CAPITAL

Stock-based compensation

We have options outstanding and exercisable that were issued under two plans, the Fixed Stock Option Plan ("FSOP") and the 10% Rolling Stock Option Plan ("RSOP").

The FSOP was originally approved by shareholders on December 11, 2002, and subsequently approved by shareholders on December 7, 2009, following certain amendments to the FSOP. The FSOP expired upon the adoption of the RSOP that was approved by shareholders on December 2, 2011, and as such, we may no longer grant options under the FSOP. However, the terms of the FSOP continue to govern all prior awards granted under such plan until such awards have been cancelled, forfeited or exercised in accordance with the terms thereof. As of September 30, 2014, we had 1,915,000 options outstanding under our FSOP, as amended, and 2,430,500 options outstanding under our RSOP.

The fair value of each employee stock option award is estimated at the grant date using a Black-Scholes option pricing model and the price of our common shares on the date of grant. The significant assumptions used to estimate the fair value of stock options awarded during the nine months ended September 30, 2014 and 2013 using a Black-Scholes model are as follows:

_	Nine months ended September 30,					
_	2014	2013				
Risk-free interest rate	0.93% - 0.99%	0.35% - 0.59%				
Expected volatility	74.7% - 79.1%	80.0% - 84.0%				
Expected dividend yield	Nil	Nil				
Expected term in years	3.25 - 3.28	3.0				
Estimated forfeiture rate	3.68% - 3.72%	3.9%				

The compensation expense recognized in our consolidated financial statements for the three and nine months ended September 30, 2014 for stock option awards was \$121 and \$439, respectively, and \$219 and \$1,173 for the same periods in 2013. As of September 30, 2014, there was \$159 of total unrecognized compensation cost related to 572,500 unvested stock options that is expected to be recognized over a weighted-average remaining vesting period of 0.67 years.

The following table summarizes our stock option activity for each of the nine-month periods ended September 30:

	2014					2013			
			Wei	ghted			Weighted		
			Av	erage			Average		
		ımber of		ercise		umber of	Exercise		
	Stoc	ck Options	P	rice	Sto	ck Options	P	rice	
Outstanding, beginning of period		4,700,500	\$	5.51		4,331,000	\$	6.42	
Granted		275,000		1.28		185,000		2.04

options grained during period	Ф	0.03			Ф	1.07			

7. COMMITMENTS AND CONTINGENCIES

Our commitments and contingencies include the following items:

Potential environmental contingency

Our mining and exploration activities are subject to various federal and state laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. We have made, and expect to make in the future, expenditures to comply with such laws and regulations. The ultimate amount of reclamation and other future site-restoration costs to be incurred for existing mining interests is uncertain.

8. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

For the nine months ended September 30, 2014 and 2013, supplemental cash flow items consisted of interest received of \$65 and \$515, respectively.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management's discussion and analysis of the consolidated financial results and condition of Rare Element Resources Ltd. (collectively, "we," "us," "our," "Rare Element" or the "Company") for the three- and nine-month periods ended September 30, 2014, has been prepared based on information available to us as of November 7, 2014. This discussion should be read in conjunction with the unaudited Consolidated Financial Statements and notes thereto included herewith and the audited Consolidated Financial Statements of Rare Element for the period ended December 31, 2013, and the related notes thereto filed with our Annual Report on Form 10-K, which have been prepared in accordance with U.S. GAAP. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including, but not limited to, those set forth elsewhere in this report. See "Cautionary Note Regarding Forward-Looking Statements."

All currency amounts are expressed in thousands of U.S. dollars, unless otherwise noted.

Introduction

Presently, we are focused on economic and geological evaluation and permitting of the Bear Lodge REE Project, located near Sundance, Wyoming. We plan to develop and produce a mixed rare earth oxide concentrate from the Bear Lodge REE Project, subject to obtaining, among other things, a positive feasibility study, the necessary mining permits and licenses, and the financing required to construct the mine and processing facilities.

As of September 30, 2014, we were considered an exploration stage entity under U.S. GAAP due to the lack of mineral reserves reported under SEC Industry Guide 7. However, we have updated and reported mineral resources that are National Instrument 43-101 ("NI 43-101") compliant, a Canadian standard. These resources have been incorporated into our recent pre-feasibility study ("PFS") and ultimately will be incorporated into our feasibility study ("FS") on the Bear Lodge REE Project.

Outlook

We have sufficient cash on hand to diligently execute our development plans through mid-2015 as well as the ability to defer certain activities and reduce our rate of expenditures if market conditions dictate. Subject to financing and other factors, major activities through 2015 include:

- Achieve key environmental permitting milestones including (i) Environmental Impact Statement ("EIS") alternatives assessment and impact analysis, (ii) Wyoming Department of Environmental Quality permit and industrial siting permit filings, and (iii) U.S. Nuclear Regulatory Commission possession license application filing;
- Support the permitting process by continuing to communicate and build stakeholder support for the Project at the federal, state, and local levels and through timely and thorough responses to federal and state agency inquiries;
- Continue to evaluate PFS recommendations and implement those necessary to optimize the Project;
- Initiate the FS, pending Board approval, incorporating the PFS information, project budgets, schedules and other factors;
- Continue to test and evaluate downstream elemental separation of our high-purity, mixed rare earth oxide concentrate;
- Distribute rare earth products generated from downstream elemental separation testwork for market testing by potential customers to allow the Company to advance one or more offtake and/or strategic partner relationships;
- Potentially develop a larger-scale demonstration facility (using recently excavated and stockpiled 1,000-ton high-grade ore sample) to minimize start-up/commissioning risk by confirming project design parameters, including materials of construction, equipment selection, reaction kinetics, etc.;
- Conduct limited condemnation drilling and evaluation to support the project development and permitting processes;
- Evaluate district-wide geological/geochemical/geophysical/mineralogical data to optimize and guide future

exploration and exploitation of the district; and

• Raise additional funds to support the above activities and continue to advance the Project in a timely fashion.

Results of Operations

Summary

Our consolidated net loss for the three-month period ended September 30, 2014 was \$3,601, or \$0.08 per share, compared with our consolidated net loss of \$6,855, or \$0.15 per share, for the same period in 2013. Our consolidated net loss for the nine-month period ended September 30, 2014 was \$11,092, or \$0.23 per share, compared with our consolidated net loss of \$16,507, or \$0.36 per share, for the same period in 2013.

For the three-month period ended September 30, 2014, the decrease in consolidated net loss of \$3,254 from the respective prior period was primarily the result of a decrease in exploration and evaluation expenses of \$3,260, a decrease in corporate administration expenses of \$463 and an unfavorable variance in currency translation of \$479.

For the nine-month period ended September 30, 2014, the decrease in consolidated net loss of \$5,415 from the respective prior period was primarily the result of a decrease in exploration and evaluation expenses of \$3,257, a decrease in corporate administration expenses of \$1,331 and a favorable variance in currency translation of \$877.

Exploration and evaluation

Exploration and evaluation costs were \$2,305 for the three-month period ended September 30, 2014, compared with \$5,565 for the same period in 2013. The decrease of \$3,260 from the prior period was mostly the result of decreased expenses associated with reduced (1) drilling program costs in 2014 of \$1,219, (2) metallurgical testing of \$1,395, (3) environmental, health and safety of \$366, and (4) engineering and development of \$414.

Exploration and evaluation costs were \$7,164 for the nine-month period ended September 30, 2014, compared with \$10,421 for the same period in 2013. The decrease of \$3,257 from the prior period was mostly the result of decreased expenses associated with reduced (1) drilling program costs in 2014 of \$2,148, (2) metallurgical testing of \$816, (3) environmental, health and safety of \$718, and (4) engineering and development of \$426.

Corporate administration

Corporate administration costs decreased to \$1,038 for the three-month period ended September 30, 2014, compared with \$1,501 for the same period in 2013. The decrease of \$463 from the prior period was due to a decrease in stock-based compensation expense as well as the Company's continual focus on containing costs. The decrease in stock-based compensation expense of \$98 was primarily the result of historically declining stock prices, which determine the strike price of the grant and are a significant driver of the expense to be incurred (as measured on the grant date).

Corporate administration costs decreased to \$3,585 for the nine-month period ended September 30, 2014, as compared with \$4,916 for the same period in 2013. The decrease of \$1,331 from the prior period was due to a decrease in stock-based compensation expense as well as the Company's continual focus on containing costs. The decrease in stock-based compensation expense of \$734 was primarily the result of historically declining stock prices, which determine the strike price of the grant and are a significant driver of the expense to be incurred (as measured on the grant date).

Non-operating income and expenses

Interest income

Interest income decreased to \$14 for the three-month period ended September 30, 2014, compared with \$32 for the same period in 2013. Interest income decreased to \$65 for the nine-month period ended September 30, 2014, compared with \$207 for the same period in 2013. The decrease in interest income from the prior period is attributable to decreased average cash balances held in interest-bearing accounts during the periods as well as decreased average yields as compared with the prior periods.

Gain/(loss) on currency translation

We report our financial statements in U.S. dollars. Therefore, any foreign currencies owned at the end of the period are converted to U.S. dollars at the current exchange rate. We hold Canadian dollars in Canadian and U.S. banks as a result of past financings that were denominated in Canadian dollars. While the majority of our expenses are in U.S. dollars, we continue to hold Canadian dollars due to higher investment returns and ongoing Canadian dollar denominated expenses. A strengthening Canadian dollar will result in gains and a weakening Canadian dollar will result in losses as long as we continue to hold Canadian dollars.

The loss on currency translation was \$212 for the three-month period ended September 30, 2014, compared with a gain of \$267 for the same period in 2013. The Canadian dollar weakened by 4.4% against the U.S. dollar over the three-month period ended September 30, 2014 and, in contrast, strengthened by 2.1% over the three-month period ended September 30, 2013. The average Canadian cash and cash equivalent balances during the three-month periods ended September 30, 2014 and 2013 were CAD \$4.7 million and CAD \$15.1 million, respectively.

The loss on currency translation was \$361 for the nine-month period ended September 30, 2014, compared with a loss of \$1,238 for the same period in 2013. The Canadian dollar weakened by 4.1% and 3.5% against the U.S. dollar over the nine-month periods ended September 30, 2014 and 2013, respectively. The average Canadian cash and cash equivalent balances during the nine-month periods ended September 30, 2014 and 2013 were CAD \$7.5 million and CAD \$22.5 million, respectively.

Financial Position, Liquidity and Capital Resources

Operating Activities

Net cash used in operating activities was \$10,940 for the nine-month period ended September 30, 2014, compared with \$15,616 for the same period in 2013. The decrease of \$4,676 in cash used is mostly the result of (a) foreign currency fluctuations on our bank accounts held in Canadian dollars, which accounted for a positive variance of \$877, (b) decreases in spending associated with exploration and evaluation activities accounting for a decreased use of approximately \$3,260, (c) timing of cash outlays associated with prepaid expenses, which accounted for a positive variance of \$293, and (d) the Company's continual focus on cost containment within corporate administration expenses accounting for a decreased use of approximately \$600. The decreases above were offset by decreased cash receipts from interest earned of \$450.

Investing Activities

Net cash used in investing activities was \$33 for the nine-month period ended September 30, 2014, compared with net cash provided of \$13,982 for the same period in 2013. The decrease in cash provided by investing activities of \$14,015 is primarily due to the net increase in cash from the sale of short-term investments of \$15,118 during the nine-month period ended September 30, 2013. Similar activity did not occur in the three-month period ended September 30, 2014. Offsetting this increase in 2013 was a land purchase in the amount of \$980.

Financing Activities

Net cash used in financing activities was \$42 for the nine-month periods ended September 30, 2014, compared with net cash provided of \$7,518 for the same period in 2013. The cash payment in the 2014 period was the result of a cashless stock option exercise where the Company was required to withhold and remit associated taxes on behalf of the exercising participant, a Canadian resident. The participant was issued the remaining net shares upon consideration of the necessary exercise and tax amounts withheld. In September 2013, the Company completed an offering providing the net inflow of cash.

Liquidity and Capital Resources

At September 30, 2014, our total current assets were \$13,310, compared with \$24,337 as of December 31, 2013, which is a decrease of \$11,027. The decrease in total current assets is primarily due to a decrease in the combination of cash and cash equivalents of \$11,015.

Our working capital as at September 30, 2014 was \$12,051, compared with \$22,605 at December 31, 2013.

Our plans through 2015 are to continue those activities necessary to advance the Bear Lodge REE Project to a FS, to continue supporting efforts on the EIS, advance the permitting processes and evaluate the feasibility of incorporating downstream elemental separation of rare earths into our project. Execution of our plans contemplates additional financing by mid-2015 to support our balance sheet and continue the current pace of project progress for further permitting, evaluation, development and construction of the Bear Lodge REE Project.

We expect that we will require between \$45 million and \$60 million of additional funding over the next two years to support the EIS and permitting processes, ongoing engineering, advanced metallurgical and elemental separation test work, FS completion, a larger-scale demonstration facility development and operation and other corporate expenses. The actual amount of the funding required prior to receiving all of the necessary operating approvals will depend on the timing of such approvals as well as the level of expenditures as approved by the Company's Board of Directors. There is no assurance that such financing will be available, or available on terms acceptable to the Company.

We extended the option covering up to 840 acres of private land in Upton, Wyoming. The option now expires in the fourth quarter of 2017. If we choose to purchase the land, the purchase price is the greater of \$1 per acre or the appraised value at the time of exercise.

As of September 30, 2014, we had effective shelf registration statements in the U.S. and Canada. As of September 30, 2014, the remaining capacity under the shelf filings was \$35.9 million in the U.S. and CAD \$50.0 million in Canada, though there is no assurance that such capacity will be available in the future.

Based on review of current permitting timetables and other factors, the Company currently projects project commissioning to begin in mid-2017, subject to permitting, financing, FS finalization and other factors, including, but not limited to, production of marketable products from the larger-scale demonstration project and contractual arrangements with potential off-take customers.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Contractual Obligations

There were no material changes to the contractual obligations disclosed in Item 7 of Part II in our Form 10-K for the period ended December 31, 2013.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCUSSION ABOUT MARKET RISK

Market risk. Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Our market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

Interest rate risk. Our cash and cash equivalents consist of cash held in bank accounts and, at times, guaranteed investment certificates that earn interest at variable interest rates. Due to the short-term nature of these financial instruments, fluctuations in market rates did not have a significant impact on estimated fair values as of September 30, 2014. Future cash flows from interest income on cash and cash equivalents will be affected by interest rate fluctuations. We manage interest rate risk by maintaining an investment policy that focuses primarily on preservation of capital and liquidity.

Foreign currency risk. We are exposed to foreign currency risk as certain monetary financial instruments are denominated in Canadian dollars. We have not entered into any foreign currency contracts to mitigate this risk. We attempt to mitigate this risk by holding six to twelve months of U.S.-based spending in U.S. dollars as a natural hedge against currency fluctuations. At September 30, 2014, a 1% increase/decrease in the Canadian dollar to U.S. dollar exchange rate would have decreased/increased our consolidated net loss by \$43.

Other price risk. Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign exchange risk.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation was carried out under the supervision of, and with the participation of, our management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design and operations of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, the CEO and the CFO have concluded that as of the end of the period covered by this quarterly report, our disclosure controls and procedures were effective in ensuring that: (i) information required to be disclosed by us in reports that we file or submit to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and (ii) information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow for accurate and timely decisions regarding required disclosure.

Changes in Internal Controls

There has been no change in our internal control over financial reporting during the quarter ended September 30, 2014, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not aware of any material pending or threatened litigation or of any proceedings known to be contemplated by governmental authorities that are, or would be, likely to have a material adverse effect upon us or our operations, taken as a whole.

ITEM 1A. RISK FACTORS

The risk factor outlined below should be considered along with the risk factors disclosed in Item 1A of Part I in our Annual Report on Form 10-K for the period ended December 31, 2013.

We expect to commence a FS on our Bear Lodge REE Project, and the results of this FS are uncertain.

We recently completed a PFS for our Bear Lodge REE Project that updated our Mineral Resource estimate and reflects our current process technology. We expect to commence work on the FS in 2015. The results of this study are uncertain and may indicate project economics that are more or less favorable than previously reported. As our project optimization efforts continue, we cannot ensure that the FS will be based upon all of the same inputs used in the PFS. As a result, we may need to update our processing technology and/or project development plans to enhance economics and further study aspects of the Bear Lodge REE Project. This could result in significant additional delays and/or expense and could make financing efforts with respect to such efforts more difficult.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

We consider health, safety and environmental stewardship to be a core value for Rare Element.

Pursuant to Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), issuers that are operators, or that have a subsidiary that is an operator, of a coal or other mine in the United States are required to disclose in their periodic reports filed with the SEC information regarding specified health and safety violations, orders and citations, related assessments and legal actions, and mining-related fatalities under the regulation of the Federal Mine Safety and Health Act of 1977 (the "Mine Act"). During the period ended September 30, 2014, the Bear Lodge REE Project was not yet in production and as such, was not subject to regulation by MSHA under the Mine Act.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit <u>Number</u>	Description of Exhibits

CERTIFICATIONS

I, Randall J. Scott, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Rare Element Resources Ltd.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - Designed such internal controls over financial reporting, or caused such internal controls over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - All significant deficiencies and material weaknesses in the design or operation of internal control
 over financial reporting which are reasonably likely to adversely affect the registrant's ability to
 record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

President Chief Executive Officer and I

President, Chief Executive Officer and Director (Principal Executive Officer)

The foregoing certification is being furnished solely pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (Section 1350 of Chapter 63 of Title 18 of the United States Code). It shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934 (15 U.S.C. Section 78r) or otherwise subject to the liability of that section. It shall also not be deemed incorporated by reference into any filing under the Securities Exchange Act of 1934, as amended, or the Securities Act of 1933, as amended, except to the extent that the Company specifically incorporates it by reference.

A signed original of this written statement required by Section 906 has been provided to Rare Element Resources Ltd. and will be retained by Rare Element Resources Ltd. to be furnished to the Securities and Exchange Commission or its staff upon request.

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350 AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (Section 1350 of Chapter 63 of Title 18 of the United States Code), the undersigned officer of Rare Element Resources Ltd. (the "Company") does hereby certify with respect to the Quarterly Report of the Company on Form 10-Q for the period ended September 30, 2014 (the "Report") that:

- 1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- 2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

/s/ Paul H. Zink

Date: November 7, 2014

Paul H. Zink

Senior Vice President and Chief Financial Officer
(Principal Accounting and Financial Officer)

The foregoing certification is being furnished solely pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (Section 1350 of Chapter 63 of Title 18 of the United States Code). It shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934 (15 U.S.C. Section 78r) or otherwise subject to the liability of that section. It shall also not be deemed incorporated by reference into any filing under the Securities Exchange Act of 1934, as amended, or the Securities Act of 1933, as amended, except to the extent that the Company specifically incorporates it by reference.

A signed original of this written statement required by Section 906 has been provided to Rare Element Resources Ltd. and will be retained by Rare Element Resources Ltd. to be furnished to the Securities and Exchange Commission or its staff upon request.
